

Chandler Arizona USA City in Greater Phoenix

Are you a small tech company dreaming of expanding to the USA?

Chandler Innovations offers you the means to make your dream come true!

Many companies come to the USA without really being trained in the way to do business in the USA, and they fail!

To solve this problem, Chandler Innovations has put in place a free program with Americans to immerse and train you in American methods while living in Chandler.

This program includes an introduction and 4 tracks.

- Introduction: Characteristics of American Culture
- Track 1 Objective: to have a ready-to-adapt prototype for the US market which will create demand (12 weeks)
- Track 2 Objective: to have income that will predict success and a plan to increase sales (10 weeks)
- Track 3 Objective: To show continuous growth, business operations and financial responsibility, with a strategy for further growth (12 to 18 months)
- Track 4: At this stage the successful alumni come together and support each other. If necessary learn to pitch, meet investors, plan business growth and define exit strategies.

These tracks can be done outside working hours, allowing you to get started. You will not necessarily need to take all the tracks except the introduction, depending on your knowledge, which will be evaluated by the center even before your departure for the US.

You will also be supported by experienced American coaches of successful alumni who will advise you and prevent you from making mistakes.

Greater Phoenix is the fastest growing region in the US with the most potential for your project, and this program is funded by the City of Chandler.
