87 seconds is a creative communication agency specialised in video productions. We believe in catchy and visual communication that empowers your business. Videos are eminently suited to get people on board of your company's story.

The presence of a short video will not only increase traffic on your website, but will also increase the conversion rate. Explain who you are and what you do with an animation video, or show your business activities and products with real footage, testify with interviews and start imagining the future with 3D videos. Nothing holds you back to combine film and animation to convey an even stronger message via the screen.

Visit us at www.87seconds.com or come by one of our offices in Brussels, Paris, Lyon, Geneva, Amsterdam and Madrid.

Accelleran is widely recognised as the global Cellular Industry's leading design team delivering the most innovative and reliable, highest performance and cost-effective designs in Small Cells over the past 8 years. Accelleran is fast becoming the technology choice for the world's leading OEM channel providers as it redefines performance standards for 4G Small Cells.

Accelleran is pioneering a disruptive approach to the delivery of cost-effective, carrier and mission-critical grade LTE TDD and FDD Small Cells through its focus on software quality and partnerships with volume manufacturers.

We offer urban, enterprise, rural and remote 4G Small Cells for Fixed Wireless and Mobile access, enabling from sparse coverage-constrained to capacity-constrained ultra-dense HetNet environments. We offer single cell and next-generation multi-carrier/multi-cell solutions which support, amongst others, the new worldwide 3.5GHz mobile capacity band and US CBRS

AppTweak was founded in 2013 by Olivier Verdin and Sebastien Dellis in Brussels, Belgium.

AppTweak is an App Store Optimization (ASO) platform focused on data accuracy and ease of use. The tool provides all data, insights and features needed to increase app installs. It enables users to audit, optimize and monitor their app's performance in 70+ countries over time. The keyword tool provided offers native and optimized keywords, along with performance indicators in over 10 languages.

AppTweak is a SaaS based on monthly (or yearly) subscriptions. Custom plans are also available. Solutions include: Personalized & Recommended Actions (ASO Reports); In-depth Competition Analysis; Mobile App Analytics; Reviews Analysis; Multilingual Keyword Tool (Keywords Suggestions & Analysis; Search Popularity, Competition, KEI indicators; and more); Consulting Services; and an API access.

AppTweak counts over 1000 accounts in over 40 countries, including Universal Music, Air France, Babel, LinkedIn, Etsy, Shopify, Chess.com, StepStone, Rocket Internet, GoEuro, Practo, S4M and more.

Hervé Lefébure, CEO
M +32 473 18 78 95 - herve.lefebure@avertim.be

Avertim is a uniquely positioned consulting group that bridges the gap between Strategy and Operations by aligning Business, Technology and Management. We bring our clients' ideas and projects to life through a profound understanding of strategic business benefits, and then accelerate their performance with a pragmatic 'doing' mindset and approach. Avertim serves companies and organizations by supporting them in three main domains of intervention: Performance Management, Risk and Compliance and Innovation.

Avertim has over 200 consultants active on strategic challenges, such as :
Data Privacy – GDPR: Identify, manage and mitigate risks and breaches in the organization;
Assessments of BIA, CIA, PIA, Data Inventory, ...

New generation networks & services: Urbanization, digital lifestyle, resource scarcity,...;
Profit from technologies: M2M, 2nd screen experience,...; Value creation through integrated solutions in other industries; Mobile broadband subscriptions increase. Customer retention & acquisition: Customer centric approach & loyalty program, gamification; Websites, cross-platform applications,...

Regulation & compliance: Communication security: BYOD, smart-device,...; Sector environmental regulations.

Benefiting from big data: Using existing data to achieve near-term results; Building analytics capabilities based on business priorities.

Avertim is organized in 3 main Business Units - Transport & Mobility, Life Sciences, Finance & Telecommunications - and has got offices in Brussels, Paris, Amsterdam and Frankfurt.

CONTACT

Arnaud MARLIERE, Chief Marketing Officer
T +32 473 25 03 06 - arnaud.marliere@awingu.com

Awingu is a software made to simplify enterprise mobility and liberate legacy applications. Our solution aggregates all company files and applications to one secure online workspace that can be accessed from any device using the browser. Awingu mobilizes all company applications (legacy and SaaS) without disrupting how you run your IT and can be deployed on your cloud of choice, private or public.

Our way of working has changed significantly over the past few years: people have an increasing desire to work from anywhere, anytime and from any device. But sadly, our workspaces and ICT tools haven't evolved at the same pace. We are still very much device- and geographically dependent, and traditional mobility solutions are often too complex for its users.

We offer one solution - Awingu. Awingu is a web-based platform, where you easily access all your files, applications, and software. Best of all, you can connect from any device, operation system or browser, from anywhere. Deploying Awingu typically takes only a few hours. You can do it in your own private cloud or in any public cloud such as Microsoft's Azure.

We are a privately owned company that excels at mobile and fixed network quality monitoring, network optimisation and analytics. We were founded in 2001, with headquarters in Belgium and regional offices in Greece & UK. Since December 2016, we have joined Systemics Group, a global leader in network quality benchmarking services.

We enable Mobile Operators to reach excellent network performance and to deliver high quality voice & data services to their subscribers.

Our active and passive network monitoring and analytics solutions, blended with our benchmarking, auditing and optimization recommendation, enable our customers to turn network performance into their competitive advantage.

DAP and DataMon, our active and passive probing solutions allow real time monitoring of 2G, 3G and LTE networks. Our Business Analytics solution provides insights in mobile data services usage. VoLTE Monitoring allows real time monitoring of each VoLTE call. We also provide measurement, benchmarking and analysis services as well as recommendations for network performance optimisation.

Our main references include Tier 1 Mobile Operators, Operator Groups and incumbent Service Providers across the EMEA region.

Winner of Google's Little Box Challenge, CE+T Power designs, manufactures and markets a range of power backup solutions for telecom operators with mission critical applications. Founded in 1934, CE+T Power has been specializing in power electronics since the 1960's and has invented the modular inverter in the end of the 1980's.

Our product range is based on an innovative AC backup solution that unlike most used UPS's

- maximizes the operator's applications uptime;
- operates with lowest OPEX;
- provides best protection to disturbances;
- optimizes footprint.

Emaze is a European private company focusing exclusively on Cyber Security. We serve three of the top 10 European Telcos. Emaze delivers specialized security services to large corporations, develops its own security software to ensure systems protection and provides a shield to its client's information systems through its private Security Operations Center (SOC), operating on a 24/7 basis. Emaze is fully independent, thus not controlled by a global software vendor or an international professional services group. Its independence is its strength and a security guarantee to its selected clients.

Emaze also develops customized security solutions to meet specific customer's requirements and integrates these solutions with existing systems.

Emaze uses an Agile and iterative approach, organising the project in phases and making available valuable features according to customer's priorities. The Agile methodology allows to adapt to changing needs throughout the development of a project. It operates with transparency to ensure high quality within cost and timing constraints.

Cyber Security is part of our DNA. It forces us to be compliant with best practices of secure software development and has allowed us to develop an unmatched knowledge of networks and telecommunications equipment security challenges.

We cover three main areas of Cyber Security: Security Assessment; Managed Security Services; Security Software

M +32 475 94 81 47 - jacques.wouters@jamosolutions.com

Jamo Solutions is a leader in Mobile Test automation. Already 8 years the Company delivers the tool licenses to test automatically mobile apps. The Company has now an easy-to-use, scriptless test automation tool named “Jamo Automator”. Its’ technology makes it possible to automate successful functional testing of mobile and web-based apps without the need to have any programming skills.

With Jamo Automator you can prove short-term high ROI on a mobile app and web app testing. You can reuse your testing assets without complicated maintenane and re-recording when new app versions become available. People with no programming skills can be included in the automation effort. The effort is focused on testing, not on programming features as with script-based tools. It is cloud-based.

Jamo Automator is an easy-to-use, cloud-based digital testing tool that allows users to automate mobile app test creation and management without the knowledge of coding/programming for any type of mobile applications. It captures user actions as screen shots. Build automated test cases can be re-executed under different conditions and against multiple versions of the app.

Jamo Solutions is working with world-wide known companies in different spheres. Amongst Company Customers is GE, Roche Diagnostics Int.,Coca-Cola Hellenic, LIDL, BNL, Deutsche Telekom, Orange etc.

CONTACT

François NARBONNEAU, Head of Smart Technologies Dpt
M +32 476 97 17 28 - narbonneau@multitel.be

Founded in 1999 by the Faculty of Engineering of the University of Mons and the Catholic University of Louvain, Multitel is a research center recognized by the Walloon Region. The main objective is to develop and support companies in their process of innovation in: Applied photonics, Network Engineering, Signal & Embedded Systems, Computer Vision, and Railway Certification and Smart Technologies.

Recognized as a centre of excellence at the international level, Multitel develops and integrates emerging technologies in the industrial sector. Thanks to its diversified expertise fields, Multitel helps companies in their technological innovation projects, in the exploratory phase, the feasibility and the development.

Ongoing developments in the field of Smart Cities, as example:

- Smart Parking: availability of parking slots based on CCTV cameras and LoRa communication;
- Glass container sensor: LoRa sensor and optimization software for collection service providers...

Multitel is also coordinator of a ERDF project "Wal-e-Cities" targeting to transform Wallonia into a smart Region.

Main references: www.multitel.be/smartcities; www.walecities.eu (website under-development); www.smartournai.be. Some of smart cities projects are carried out in partnership with Proximus and the company IT-Optics.

Certification: ISO 9001 and our Railway Certification department is ISO/CEI 17025.

Gregory COSMAN, Global Head of Pyco Consulting
M +32 494 76 74 76 - gregory.cosman@pycogroup.com

PYCO GROUP is a digital consulting and software development agency. Created in 1999, we are a global team of passionate consultants and developers who deliver result driven digital solutions. PYCO Group has 9 offices, works in 4 continents and has over 450 team members.

PYCOGROUP has broadened its initial service of web and mobile development for advertising and marketing agencies around the globe to a full digital outsourcing, software development and consulting company, offering multinationals integrated services from start to finish. PYCOGROUP helps business leaders re-imagine, design, build and operate a smooth digital business transition, thanks to the knowledge of our onshore and offshore dedicated teams, with growing production facilities in many countries. In addition, it has set up over several new ventures in Vietnam thanks to partnerships with Yellow Pepper Technologies (a US pioneer in mobile payment and banking), Atlassian (Australia's leading provider of collaborative software), Magnolia (creator of a digital business platform with a powerful CMS) and ansarada (a global provider of virtual data rooms for merger and acquisition due diligence).

PYCO CONSULTING is a specialized digital consulting and staffing agency focused on building and operating teams designed to suit your needs. PYCO DIGITAL is a premium offshore web and mobile development agency. PYCO VENTURES specializes in the Build-Operate-Transfer model to successfully launch your overseas development subsidiary.

MAIN REFERENCES: Global-scale clients making use of the PYCOGROUP's products and services include Atlassian, Microsoft, Samsung, Volkswagen, Wal-Mart, Adobe, Coach, Box.com, LVMH, Mitsubishi, Calvin Klein, L'Oreal amongst many others.

AUTOMATE YOUR MOBILE TESTS WITH QUAMOTION

Quamotion provides test automation software for mobile applications. With Quamotion, you can speed up your mobile tests and reduce the amount of money you spend on testing and devices. You can test mobile apps and websites on iOS and Android devices and emulators, using your favorite scripting language on Windows, Mac or Linux.

In a nutshell, Quamotion offers a mobile test automation suite built on top of open standards that allow you to automate your tests, run them on multiple devices and analyze the results. Quamotion's software is being used worldwide to test and monitor mobile apps. Customers choose Quamotion because:

- An obsessive focus on ease-of-use allows you to kick start your mobile tests – no long manuals or complex steps required to get started.
- A comprehensive scripting support allows you to write scripts which are easy to understand and maintain.
- Quamotion builds on top of the open source WebDriver (Selenium) protocol, given you an open and extensible platform for automating mobile apps.
- Our integration with other testing tools, such as Jenkins, allow you to integrate mobile testing in your software development cycle.
- The Quamotion platform supports both in-house testing as well as cloud-based testing.
- Our support for multiple operating systems and scripting languages enable you to use the technologies you're most familiar with.

Quamotion provides software and cloud services for testing mobile applications.

Quamotion's customers include broadcasters, digital agencies and consulting companies.

Essares, is a technology startup, spin off of ucl (université catholique de louvain) founded in 2015. Tessares develops software solutions (hybrid internet access) for telco operators and internet service providers.

Tessares provides next generation Internet Access Bonding – the invisible bonding of existing Fixed and Mobile networks into a 'single pipe' to deliver more speed across a larger geographic territory, addressing the consumer multi-play market suffering a marginal service.

In order to aggregate the bandwidth of the DSL network with that of the LTE network:

- a) The Tessares Agent (software) is deployed on the home or business gateway / access point which becomes an Hybrid CPE (HCPE),
- b) The Tessares Hybrid Access Gateway (HAG) is deployed in the datacenter of the service provider.

BRUSSELS Invest & Export is the foreign trade and investment agency of the Brussels-Capital Region. It aims to promote the internationalization of the Brussels economy. Brussels is not only the Belgian and European capital, home of NATO and EU headquarters, but it is also a large business centre at the heart of the European market.

BRUSSELS Invest & Export assists Brussels' companies operating in foreign markets. Almost ninety economic and trade commissioners across all continents provide free guidance to SMEs, target potential local prospects and partners, organize matchmaking events... Concrete initiatives in Brussels and abroad include trade missions, contact days, invitations of decision makers and collective stands at international trade fairs.

Brussels' exporters are listed in a database, www.brussels-exporters.be, which can be accessed by all foreign companies searching for partners.

Another mission of BRUSSELS Invest & Export is to attract foreign companies to Brussels and to provide them with support, should they decide to locate their business in the Region. To enable investors to assess the benefits of establishing in the capital, BRUSSELS Invest & Export offers them a « Welcome Package » which includes equipped office space at no cost for a three-month period.

To support the above mentioned activities, BRUSSELS Invest & Export has developed a trade counseling service to help companies individually with their internationalization process as well as a competitive and economic watch service to monitor and inform on international trends and opportunities.

The Flanders Investment & Trade agency promotes sustainable international business, in the interest of both Flanders-based companies and overseas enterprises.

Whatever sector you are involved in, Flanders Investment & Trade will help you establish contact with the Flemish companies you are looking for. This includes not only products or services you may be sourcing, but also various types of business relationships, from joint ventures to technology transfers.

At another level Flanders Investment & Trade enhances Flanders' position as the gateway to Europe for inward investors. The agency identifies, informs, advises and supports overseas enterprises by establishing production and research facilities, contact centers, headquarters, logistics operations and the like in Flanders, the northern region of Belgium. This broad focus on international entrepreneurship, involving outward trade as well as inward investments, requires not only a thorough knowledge of Flemish economy, but also an extensive network outside of Flanders. We have just that for you.

Do visit our website and discover our worldwide network. With over 75 offices we are bound to be conveniently located near you, wherever you are.

Caroline MORES - Delegate
T +32 2 421 84 07 - c.mores@awex.be

The Wallonia Foreign Trade and Investment Agency (AWEX) is the Wallonia Region of BELGIUM's government agency in charge of foreign trade promotion and foreign investment attraction.

The agency has a worldwide network of 109 Economic and Trade Attachés. AWEX has been certified ISO 9001 since April 2002.

As a foreign trade agency, AWEX carries out a mission of promotion and information for the benefit of both Wallonia and the foreign business community.

Upon request, AWEX assists buyers, decision-makers, importers and foreign prospects by:

- Providing economic data on Wallonia and its export potential
- Disseminating information on products and services from companies located in Wallonia
- Identifying companies in Wallonia for international partnerships
- Distributing lists of exporters from Wallonia

As an export partner for Wallonia-based companies, Awex offers a wide range of export-oriented services and activities:

- General and commercial information on foreign markets
- Market studies tailored to specific areas upon request
- Organization and planning of marketing activities (international trade shows, economic missions, sector-based Contact days...)
- Establishing Contacts with international organizations
- Promoting Wallonia's export potential abroad
- Financial support and export financing
- Training in international careers

As a foreign investment agency, AWEX - via its Office for Foreign Investors - has an overall responsibility for the attraction of foreign investment in Wallonia. This includes seeking out and providing information to potential foreign investors. The Agency also offers a pro-active follow-up service to investors already established in Wallonia. In addition, it is in charge of identifying new foreign investors for the acquisition of industrial sites under restructuring process.

The ICT platform for Wallonia. Located at the heart of the ecosystem of initiatives and ICT stakeholders in Wallonia, Digital.

Wallonia is their place of convergence, expression and support.

Digital Wallonia is a true Hub, offering layers of customizable services activated on demand, in an open and participative model:

- Dynamic mapping of the ICT ecosystem. ICT profiles (companies, actors, innovative users), products and services, technology clusters, digital communities, ...
- Vision & digital uses. Plan for the digital by the Walloon Government. Technological, legal and economic watch, content and white books, barometer and ICT indicators, ...
- Services and Support. Online (data, API, calendar, ...) and physical, for the partners and all the stakeholders of the ICT ecosystem (schools, public services, companies, ...), according to the needs.
- Open Data. Hub for the Walloon Open Data, services for the public actors for the management and open data, ...

Digital Wallonia is powered by the Agence du Numérique (AdN), subsidiary of the Agence pour l'Entreprise et l'Innovation (AEI).

DSP VALLEY FLANDERS

Professor Roger Van Overstraetenplein 1
3000 Leuven

www.leuvenmindgate.be

DSP Valley is a European cluster of excellence in Smart Electronic Systems.

As a cluster of excellence in smart electronic systems and embedded technology solutions, DSP Valley groups 120+ members. Technologies covered are all kinds of signal processing, audio, video, intelligent sensors, or wireless/wired communication. Application domains and markets include smart health, smart home, smart vehicles ...

With its extensive offer of high quality activities DSP Valley is one of the top clusters in Europe in the area of smart electronic systems and embedded technology solutions. Its activities include for example regional and international inter cluster B2B forums, Academia-to-Business forums, a shared group booth at international exhibitions, custom matchmaking events, technical seminars, a bi-monthly newsletter and brokerage services for participation in European ICT programs.

Commissioned by IWT (Agency for Innovation by Science and Technology), DSP Valley has recently developed the strategic roadmap 'Nano-electronics for Flanders'. This way Europe wants to support the Flemish region and its developments. An economic analysis shows that the micro/nano-electronics (MNE) sector flourishes in Flanders. In 2012 the MNE companies in Flanders employed more than 22,000 employees. In relation to other sectors, the MNE sector has grown significantly stronger the last decennium. The roadmap maps opportunities for the sector, in terms of societal challenges in health and wellness, home / buildings, mobility, communications and energy. Besides opportunities for the industry, the roadmap also discusses significant challenges.

The Enterprise Europe Network (EEN) offers support and advice to European SMEs, helping them to make the most of business opportunities in the EU. Launched in 2008 by the European Commission, EEN has branches in more than 60 countries and is supported by 600 partner organizations in and outside Europe.

Its 3000 experts help businesses to:

- grow and innovate,
- find business partners and new markets abroad,
- turn ideas into marketable products and profits,
- make the most of EU financing and funding, and research funding in particular.

Walloon SMEs can easily benefit from this substantial and accessible business and technology partnering network, thanks to 9 local organisations delivering support right to their doorstep.
