

## Trade Profiles **2016**

---

## About the WTO

The World Trade Organization deals with the global rules of trade between nations. Its main function is to ensure that trade flows as smoothly, predictably and freely as possible.

## About this publication

*Trade Profiles* provides a series of key indicators on trade in goods and services for 195 economies. The data are taken from a variety of sources, and each profile is presented in a handy two-page format, allowing for easy comparison between economies.

## For more information

Further statistical information is available on the WTO web site at [www.wto.org/statistics](http://www.wto.org/statistics)

# Introduction

---

*Trade Profiles* contains key indicators for both merchandise and services trade as well as statistics on intellectual property for 195 economies. The information is derived from many sources, such as customs statistics, national accounts, balance of payments statistics, foreign affiliates statistics (FATS), foreign direct investment (FDI) statistics, and industrial property statistics. Data for each economy are presented in a standard two-page format to allow for quick comparison between economies.

The first section for each profile provides a snapshot of the importance of trade in the overall economy - listing a number of indicators, such as trade as a percentage of GDP and the economy's world ranking for both merchandise and services trade.

The second section covers merchandise trade – providing information on total trade flows broken down by product categories and major origins and destinations. The section provides statistics on the most exported and imported agricultural and non-agricultural products as well as statistics on inflows and outflows of FDI.

The third section covers trade in commercial services – providing information on total trade flows broken down by the type of services trade and major origins and destinations.

It also contains information on inward and outward FATS and FDI in services (stocks). Detailed trade statistics are provided for transport (including mode of transport), travel, and other commercial services and goods-related services. It also presents statistics on FDI inflows and outflows.

The final section covers industrial property – providing the annual number of applications for patents, trademarks and industrial designs for residents and non-residents of each economy.

# Technical notes

**GDP (gross domestic product)** is the sum of output within the economy's territory minus the sum of intermediate consumption (increased by taxes net of subsidies on products). It is measured in nominal terms and with market exchange rates.

**GDP per capita** is estimated as an economy's GDP divided by the population. It is calculated on the basis of data for the three latest years available.

**Current account balance (% GDP)** is estimated as the sum of an economy's net exports of goods and services, net primary income, and net secondary income divided by GDP. It is calculated on the basis of data for the three latest years available.

**Trade per capita** is estimated as an economy's trade in goods and commercial services (average of exports and imports, balance of payments basis) divided by the population. It is calculated on the basis of data for the three latest years available.

**Trade to GDP ratio** is estimated as an economy's trade in goods and commercial services (average of exports and imports, balance of payments basis) divided by GDP, on the basis of data for the three latest years available.

**Ranks in world trade of merchandise and commercial services** are defined initially by referring to European Union (EU (28)) members as individual traders and secondly by referring to the EU (28) as one trader (i.e. excluding individual EU (28) members).

## Merchandise trade (customs-based statistics)

**The share of merchandise in world total exports and imports** for individual economies is calculated using world trade including intra-EU (28) trade. For the EU (28) as one trading reporter, the share is calculated on the basis of world trade excluding intra-EU (28) trade.

**Breakdown by main commodity group** according to the definitions contained in the WTO's "World Trade Statistical Review 2016".

**Agricultural products** refer to food (Standard International Trade

Classification Rev. 3 sections 0, 1, 4 and division 22) and raw materials (SITC Rev. 3 divisions 21, 23, 24, 25 and 26). It differs from the definition contained in the WTO Agreement on Agriculture (see below).

**Fuels and mining products** include ores and other minerals, fuels and non-ferrous metals.

**Manufactures** refer to iron and steel, chemicals, other semi-manufactures, machinery and transport equipment, textiles, clothing and other consumer goods. Please note that due to the products not classified in the three main product groups, the sum of the shares may not add up to 100.

**Breakdown by main destination and origin:** EU (28) members are grouped as one trading partner. Re-imports are also included.

**Agricultural products, top exported products and top imported products** are the top five traded agricultural goods of an economy at the HS 4-digit level. According to the definition of the WTO Agreement on Agriculture, agricultural goods refer to HS chapters 1 to 24 (excluding fish and fish products) and a number of manufactured agricultural products (for further information, see "The Legal Texts: The Results of the Uruguay Round of Multilateral Negotiations", WTO). This definition does not correspond to the definition of agricultural products presented in the breakdown of merchandise trade by main commodity group (see above).

**Non-agricultural products, top exported products and top imported products** (non-agricultural market access products) are the top five non-agricultural goods of an economy at the HS 4-digit level. Non-agricultural goods refer to the products not covered by the WTO Agreement on Agriculture.

## Trade in commercial services (balance of payments based statistics)

**Commercial services** equal total services minus "government goods and services, not included elsewhere".

## General note

Minor discrepancies between constituent figures and totals are due to rounding.

Annual average percentage changes are calculated using a geometric average. In cases of data unavailability for 2015, the average annual percentage change "2010 – 2015" refers to "2010 - latest available year".

Unless otherwise indicated:

- (i) all value figures are expressed in US dollars
- (ii) trade figures include the trade within free trade areas, customs unions, geographical and other groups
- (iii) merchandise trade figures are on a customs basis
- (iv) merchandise exports are f.o.b. and merchandise imports are c.i.f.

Data for the latest year are provisional.

The statistical data in this publication are supplied by and under the responsibility of the relevant statistical authorities. The use of such data by the WTO is without prejudice to the status of or sovereignty over any territory, or to the delimitation of international frontiers and boundaries.

**Comments and enquiries on this publication should be addressed to [statistics@wto.org](mailto:statistics@wto.org)**

**Closing date for the provision of trade flows is 15 May 2016 and 16 September for other indicators.**

## Symbols and abbreviations

...	Not available or not reported
-	Not applicable
AOA	WTO Agreement on Agriculture
FATS	Foreign Affiliates Statistics
FDI	Foreign Direct Investment
GATS	General Agreement on Trade in Services
GDP	Gross Domestic Product
HS	Harmonized Commodity Description and Coding System
ICTs	Information and communication technology (specifically telecommunications, computer and information services)
Intellectual property	Charges for the use of intellectual property not included elsewhere
NAMA	WTO Non-Agricultural Market Access
Personal & cultural	Personal, cultural and recreational services

**The share of commercial services in world total exports and in world total imports** for individual economies is calculated using world trade including intra-EU (28) trade. For the EU (28) as one trading reporter, the share is calculated on the basis of world trade excluding intra-EU (28) trade.

**The breakdown by main services items** follows the definition of the 6<sup>th</sup> edition of the IMF Balance of Payments Manual (BPM6).

**Transport** covers sea, air and other services, including land, internal waterway, space and pipeline transport services that are performed by residents of one economy for those of another and that involve the carriage of passengers, the movement of goods (freight), rentals (charters) of carriers with crew, and related supporting and auxiliary services, including postal and courier services.

**Travel** covers the goods and services acquired by a traveller while outside the territory of residence. Travel can be undertaken for personal or business reasons.

**Other commercial services** include construction, insurance and pension services, financial services, charges for the use of intellectual property not included elsewhere, telecommunications, computer and information services, other business services, and personal, cultural and recreational services.

**Goods-related services** cover manufacturing services on physical inputs owned by others and maintenance and repair services not included elsewhere.

**Breakdown by main destination and origin:** EU (28) members are grouped as one trading partner.

**FATS (foreign affiliates statistics)** refer to data for foreign affiliates for which foreign investors own more than 50 per cent of the voting power or equity interest. Sales measure gross operating revenues, less rebates, discounts and returns. In the profiles, FATS sales refer to affiliates primarily engaged in services activities and exclude wholesale and retail trade and repair activities. For an individual economy's coverage, refer to tables A62 and A63 in the publication "World Trade Statistical Review 2016".

**FDI (foreign direct investment) in services stocks** cover the following ISIC Rev. 3 sectors: wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods; hotels and restaurants; transport, storage and communications; financial intermediation; real estate renting and business activities; education; health and social work; other community, social and personal services; private households with employed persons. For some economies, data cover the following ISIC Rev.4 sectors: wholesale and retail trade; repair of motor vehicles and motorcycles; transportation and storage; accommodation and food service activities; information and communication; financial and insurance activities; real estate activities; professional, scientific and technical activities; administrative and support service activities education; human health and social work activities; arts, entertainment and recreation; other service activities; activities of households as employers; undifferentiated goods- and services-producing activities of households for own use.

## Industrial property

Data refer to the annual number of applications for patents, trademarks and industrial designs in the name of residents and non-residents of the economy.

## Statistical sources

Eurostat; the International Monetary Fund; the International Trade Centre; the Organisation for Economic Co-operation and Development; the United Nations Statistics Division; the United Nations Commodity Trade Statistics Database; the World Bank; the World Intellectual Property Organization; United Nations Conference on Trade and Development; the World Trade Organization and national statistics.

*EU (28) refers to the EU members as of July 2013, including EC-12 (Belgium, Denmark, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain and the United Kingdom) and Austria, Bulgaria, Croatia, Cyprus, Czech Republic, Estonia, Finland, Hungary, Latvia, Lithuania, Malta, Poland, Romania, Slovak Republic, Slovenia and Sweden. The Separate Customs Territory of Taiwan, Penghu, Kinmen and Matsu is referred to as Chinese Taipei in the tables.*
