If you would like more information on the contents of this report or if you have any comments or suggestions for improvement please contact the International Trade Statistics Section (statistics@wto.org; www.wto.org/statistics).

Trade Profiles 2016 provides a series of key indicators on trade in goods and services for 195 economies. For merchandise trade, major exports and imports are listed for both agricultural and non-agricultural products as well as major origins and destinations for these products. For trade in services, a detailed breakdown is provided for transport, travel and other commercial services. Statistics on intellectual property are also provided. The information is available for all WTO members and observers and for other selected economies.

For each economy, the data is presented in a handy two-page format, providing a concise overview of global trade. The publication is an invaluable reference tool for anyone looking for essential trade statistics.
